

Semiconductor resource guide

can't-miss resources for the
semiconductor industry

Semiconductor

resource guide

Central Florida boasts more than 180 companies operating in the semiconductor and related industries, collectively generating an annual revenue of \$780 million while providing employment to 7,640 individuals.

The Corridor is proud to encourage this exponential growth by partnering with research institutions, economic support organizations, government and businesses in the region to make Florida a destination for semiconductor innovation. In fact, in 2022, The Corridor was a key partner in a consortium that assisted Osceola County in receiving \$50.8 million from the U.S. Department of Commerce's Economic Development Administration (EDA) to develop Central Florida's semiconductor and microelectronics industry cluster and boost the manufacturing capabilities of Osceola County's 500-acre high-tech campus, NeoCity.

As Florida cements its position as a hub for semiconductor and related organizations, the demand for supporting this thriving industry increases. This resource guide is crafted with the intention to equip industry members with avenues for collaboration, connectivity, education and advancement, ensuring their continued success within this explosive region.

BRIDG

BRIDG is a not-for-profit, public-private partnership. Through support and collaborations established with Osceola County, Florida High Tech Corridor Council, imec, Orlando Economic Partnership, TEL, SUSS, Siemens, and SkyWater Technology (Center for Neovation operator), BRIDG provides a collaborative process to connect challenges and opportunities with solutions; “Bridging the Innovation Development Gap” making commercialization possible. Located at NeoCity—a 500-acre master-planned community of innovation in Florida—BRIDG is centrally located 20 minutes from Orlando International Airport and within a mile of Florida’s Turnpike.
